

# BackBar Shelf Install

## SET-UP INSTRUCTIONS

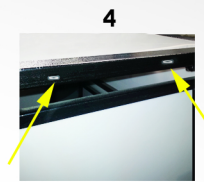

Locate 4 brackets. They will stabilize shelf onto BackBar.

Slide brackets onto BackBar's counter frame left/right edges.

Spread brackets as shown (back 2 closest to corner).

Use side holes on frame as guides for positioning brackets.

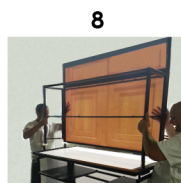

After brackets in place, make sure shelf is unfolded.

If you have signage, insert into shelf.

Full shelf with signage are ready to attach to BackBar.

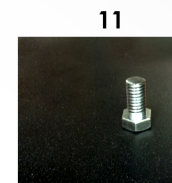

Lift shelf carefully, evenly insert legs into brackets.

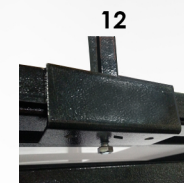

Shelf should be secured & may slide forward/backward.

Adjust shelf in preferred position.

Locate bolts (1 per bracket needed).

Screw bolt in middle hole of bracket securely. Extra bracket holes are for additional bolts but not necessary.

### CAUTION:

The BackBar PLUS Shelf is portable but heavy. Use care when lifting and moving to avoid toppling. Use two people if possible to lift.
